

Background:

The staff of the Tesla Motors Highland Park location reached out to EHLS to solve their accessibility obstacle. Their challenge was their office being located on a higher level than the body shop. EHLS surveyed their issues and recommended a commercial vertical platform lift to assist their wheelchair bound customers.

Obstacle:

- **Wheelchair Access** – the only wheelchair access was located on the exterior of the building forcing customers outside

Solution:

- Installed a Commercial Vertical Platform Lift
 - ADA compliant with keyed interlock
 - Lower landing gate with interlock and auto ramp
 - Platform gate
 - Upper landing gate with interlock
